Dear Bill,

I wanted to take a moment to thank you for your professional and effective business personal tax consulting service. I was very skeptical that any serious tax reductions could be accomplished after your initial explanation of your tax strategy. And in talking to other businesses in my local community, your strategy sounded too good to be true. However when I thought about everything you talked about I decided that we could not be in any worse shape than if we had rendered ourselves, so I decided to give your strategy a try.

After our first year of service the results were as Bill presented to us and our CFO is praising your service and results. The benefit to the company's bottom line has made a significant impact. And your excellent personalized service certainly adds to the entire package that Tax Advisors Group offers.

Bill, you have positioned TAG as a unique force in the property tax service arena and I plan on continuing with your strategy far into the future. We consider you and your team at TAG an integral part of our business.

Sincerely,

Dewayne Ekrot
